Nick Jackson Co. Inc. Yacht Davit Systems

When you need to EXTEND, do so UNDER LOAD with ease. You have 36" of extension. Variate to your need, up to 9' maximum.

The cable length remains set as you extend.

This makes it very easy to get the extra "Launch" length when deploying out board without worrying about your cable retracting.

Variable extension From 6'2" minimum, to maximum 9' extended reach is standard. LONGER LENGTHS AVAILABLE on request.

Our polished Stainless nose is adjustable under load.

THE CABLE DOES NOT SHORTEN WHEN NOSE EXTENDS

Choose from either PYRAMID mounting, (shown above) or Standpipe Model. (shown right view) We can work with you for your special application as needed.

Systems come complete with hydraulic power pack, (choose 12v 24v or 115v.) stainless steel hydraulic hoses, 8 button remote control pendant for 4 Function control and correct paint code to match your specific yacht.
